Calgary Oddfellows Visit Didsbury Lodge

Over forty Calgary Brothers visited the Didsbury Lodge, No. 18, I.O.O.F., last Thursday evening when a number of new candidates received the second degree. The work was ably put on by officers of the local lodge assisted by a few of the Calgary brothers.

After Lodge was closed, tables were set for lunch and the seventy-three oddfellows who sat down, enjoyed a splendid time. Following lunch, Bro. Adshead as toastmaster, called the boys to order and a fine social hour was spent. Speeches were made by a number of the visitors and local members.

Arrangements have been made for Didsbury Lodge to visit Calgary on Tuesday, September 9th. The third degree will be conferred on our candidates by the crack degree team of Crescent City Lodge, famous for its degree work. The ceremony will be given in Sandstone Lodge. All Calgary Lodges as well as Crossfield, Airdrie and Didsbury will be present, so that an evening is promised that ought to be long remembered by oddfellows.

Olaf Arneson Is Granted A Reprieve

Olaf Arneson, convicted slayer of Steven (Pat) Best and sentenced to be hanged on August 12th, has been granted a reprieve to allow his solicitors, Bury and Bury to proceed with their appeal case. The reprieve is extended until October 1st.

Eighth Fortnightly Crop Report

As harvest approaches, the condition of crops throughout the Province is better than was anticipated earlier in the season. With the exception of the south-eastern part of the Province and central eastern areas, crops are good. In the eastern area where conditions were unfavorable throughout the early part of the growing period, late rains have caused excellent growth of oats and barley and if the frost-free period is prolonged, there will be a fair yield of wheat.

The hot, dry weather of the past fortnight has caused too rapid ripening of crops in the south-eastern part of the Province where moisture was not plentiful. In the central and northern areas where heavy rain fell during July and where the crops were maturing slowly, high temperatures have caused more rapid ripening without serious injury to quality.

Wheat-cutting has commenced in the south and will be general next week. Throughout the central and northern areas, cutting will be general in from ten to fourteen days.

Frost has been reported from one point in the Peace River district but damage seems to have been very slight. Hail damage has occurred at several points in the Province.

Conditions with regard to pasture, hay and feed are satisfactory. In alfalfa-growing areas, the second growth is fairly heavy and of good quality. The sugar beet crop is better than the average.

LOCAL & GENERAL

Miss Ruth Brubacher has been appointed to teach at Olds Public School.

Mr. and Mrs. Hugh Lee motored down to Carleton Place and spent the week-end there.

Just the rig for your telephone desk. Scratch pads at the Pioneer Office, 2 for 5c.

J. D. Thomas and family returned on Sunday from a holiday spent in B.C.

Mr. and Mrs. C. H. Adshead and Mr. and Mrs. Percy Lunt are spending a two weeks vacation at Weyndell and other B.C. points.

Mr. F. H. Osmond, late of the "Pioneer" and now of Spokane, was renewing old acquaintances in town this week.

Misses Ruth Brubacher, Juanita Wilson, Lottie Hunsperger and Aleda Huget returned last Saturday from Summer-school at the University of Alberta.

Mrs. Dave McEwen of New Westminster, who has been visiting her daughter, Mrs. Carmichael, for the past two months, returned home on Friday.

Rosebud Flour Mills chopped their first load of grain from this year's crop on Monday. This is a good deal earlier than any previous season. The grain was chopped for Otto Klein.

Mr. and Mrs. Thompson and daughter of Vegreville, spent the week-end with Mr. and Mrs. W. J. McCoy. Mr. Thompson was formerly manager of the North End Lumber Yard.

Brennan Bros. were winners of the Bank of Montreal Cup for best grade dairy cows at Didsbury Fair. This is the third time they have won the cup and it now becomes their property.

Mr. and Mrs. Ivan Weber, accompanied by the latter's mother, Mrs. G. E. Goodhand and her sister, Mrs. Briggs of Moose Jaw, motored to Lethbridge for a week-end recently. Mr. Weber returned by train, the rest of the party by motor, later.

Mr. Harold G. Reiber who was in the chemistry department at the University of Alberta for the past eighteen months, visited his parents here over the week-end. Mr. Reiber was on his way to the University of California at Berkeley, having won a scholarship to that institute. Mr. Reiber is the first chemistry student in the Province to win a scholarship to the University of California. In addition to taking up studies, he will be an assistant instructor.

There were 3,200 cars and 9,500 persons at Sylvan Lake last Sunday.

Miss Marie Chambers has accepted a position at the Innisfail Hospital.

Mrs. Bert Fisher is visiting friends in Edmonton this week.

Mr. and Mrs. J. W. Wordie and family left yesterday on a motor trip to Field, B.C.

Mr. and Mrs. W. A. Teskey and daughter Helen are spending their vacation at Banff this week.

Mr. A. W. Reeves, late principal of the High School, was in town last week-end.

The painting of the exterior of the Public School is now in progress.

Mr. Bert Fisher accompanied a number of Calgary friends on a fishing trip north-west of Cochrane on Sunday.

Mrs. Geo. Smith, Mrs. J. W. Phillipson and family and Mrs. Ben Spink are enjoying the week at Sylvan Lake.

Mrs. Tom Stark and son of Drumheller is visiting her brother, Mr. J. A. McGhee and renewing old acquaintances in town.

Mr. Gordon Ferguson of Nelson, B.C., who has been spending his vacation with Mr. and Mrs. J. Robertson, returned home Saturday.

Miss McKenzie who has been in Edmonton, marking examination papers and attending summer-school returned to Didsbury on Saturday.

The barn dance at W. J. Scheidt's Wednesday last was well-attended and all report having had a good time. Bellamy's orchestra supplied the music.

Mr. Frank Kaufman has received the contract for the installation of a steam heating plant in the High School building. He expects to have the work completed before school commences.

Mrs. Beatrice Briggs of Moose Jaw, who has been holidaying for the past month with her mother, Mrs. J. E. Goodhand and her sister, Mrs. Ivan Weber, has now returned to her home in the east.

On Saturday, Mr. and Mrs. J. A. McGhee entertained Mr. Morgan of Imperial Oil Company, of Toronto and Mr. and Mrs. Sam Coultis and family of Turner Valley. Mr. Coultis is superintendent of drilling for the Imperial Oil Co.

Messrs. F. Fleury and D. Dippner of Calgary, visited Mr. and Mrs. J. H. Fleury over the week-end. Along with Mr. and Mrs. Caithness and Roland Hawkes, they made a fishing trip to Fallen Timber. The party had wonderful luck fishing, but say that as an angler, Jim Caithness makes a dandy chauffeur and that Jack Fleury was the only one who really found out how cold the water was.

Teachers Appointed For Didsbury Schools

The teachers for the ensuing year are as follows—

High School: Principal: Mr. J. C. Hembling who comes here from Hawarden, Sask.; Miss McNab and Miss McKenzie, both of whom are re-engaged.

Public School: Principal: Mr. C. R. Ford; Mr. Arthur W. Reiber; Miss Nellie Wilson; Miss A. Black and Miss R. Liesemer.

Elkton Softball Team Win In Final Game

On Saturday evening last, Elkton and Westcott softball teams met in the final game for the Fair Tournament prize, on the baseball diamond. Both teams brought in a large number of supporters.

The Elkton boys got well in the lead in the early stages and finished up as winners. The final score was 16-11.

Marketing and Distribution

The problem with which industry is confronted today is marketing, declares Donald M. Marvin, economist, in the monthly letter issued by the Royal Bank of Canada. To quote Mr. Marvin:

"Early economic thought had its birth in a philosophy of trade, but this line of thought was rapidly displaced by theories concerning production. In theory, trading operations became a mere adjunct to productive processes, and, except as regards foreign commerce, occupies a very subordinate place in economic literature. The engineering genius of the world has been focussed on methods of manufacture. The last half century witnessed the growth of large scale production and remarkable improvements in productive efficiency, but relatively speaking, distribution has escaped attention. Today this is changing; the problem with which industry is confronted is that of marketing."

While increased attention is being given to the principles and practices of marketing, data relating to this field are far less comprehensive than for other branches of human activity. Population, production, prices, export and import, and many other kinds of statistics are available in abundance and in a high degree of excellence. Official statistics relating to agriculture, mining and manufacturing have been collected for many years. The number of persons engaged in these activities is known, together with varied information concerning the quantity and quality of their products. There are no comprehensive statistics of distribution and it is in this field that the need for further information is undoubtedly most acute.

The relative merits of the chain store, department store, mail order house and the local independent dealer have long been the subject of controversy and speculation. The fear that the independent merchant is being crushed to the wall by an over-powering competition has frequently been expressed. What the actual situation may be, not only as regards retail trade as a whole but as regards its different branches, can only be discovered when adequate information concerning distribution is available.

Urgent necessity has moved many private concerns to seek information in this field, but private enterprise has gone about as far as it can go in providing this information. Unfortunately, the results have been incomplete and only serve to emphasize the necessity of a comprehensive statistical study of the subject. The first requisite for such an analysis of distribution is a census of all manufacturing, wholesale and retail establishments which are engaged in distribution. Such a survey will be undertaken by the Dominion Bureau of Statistics in connection with the regular decennial census in 1931. The schedules will contain questions relating to the kind of business, number of employees, salaries and wages paid, inventories, expense of doing business and capital invested.

This census will be of great benefit to all those who wish to make an intelligent study of the problem relating to marketing in Canada. It will supply the basic statistical material required, and provide a comprehensive picture of the various outlets for an extensive list of commodities and groups of commodities. The relative proportion of cash and credit sales will be given. Presentation of the data in the form of averages will furnish a basis with which individual organizations may judge their own results. A picture of consumer demand in each section of the country will be presented, together with information showing the various types of outlets through which they are now reached. Such data will be invaluable in the preparation of advertising and sales campaigns. While the advantages of this type of information to manufacturers and distributors is obvious, the fact that the consumer will benefit through the economies which should result, should not be overlooked.

Studies relative to the cost of living will be assisted by data showing the percentages of consumers' purchases of food, clothing, fuel, and other groups of products. Special methods of distribution adapted to certain districts will be shown, and additional light will be thrown on the movement of commodities between the various provinces of Canada. The compilation of these statistics and others of a like character should produce material of substantial benefit to industry and trade.

The success of this survey will depend very largely on the wholehearted co-operation of those who supply the individual returns. The need for the information has become particularly urgent as advances in methods of production have pressed the problems of distribution more and more upon the attention of business leaders. With the added information made available, a real analysis of the problems of distribution will be possible and more effective measures devised for their solution.

Saskatchewan Power

Seven Hundred and Fifty-Eight Miles
Of High Tension Lines To Be
Built This Year

The Saskatchewan Power Commission is calling for tenders for the building of 758 miles of high tension lines to make available electric energy for the use of some 58 towns and villages throughout the province, sible so that the lines can be completed and in operation by the end of

October or beginning of November. The power will be supplied by plants located at Saskatoon, Prince Albert and Moose Jaw.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Vulnerable To Air Attack

Naval Vessels Of Every Type Are At
a Disadvantage

Improvements in air warfare are much more important than the public has been permitted to know. General William Mitchell was a little ahead of the times when he asserted that battleships had been made obsolete by aircraft developments. Nevertheless, naval vessels of every type are vulnerable to air attack. France's superiority to Great Britain in aircraft is so great that the British Navy, whatever its type of vessels, is at a disadvantage.

Wheat Acreage Less

Decrease In Acreage As Compared
With Last Year, Is About 8 Per
Cent.

Total estimated areas sown to wheat in Canada for the 1930 season is 24,583,300 acres, as compared with 25,255,002 acres finally reported for 1929, according to the weekly crop report recently issued by the Dominion Bureau of Statistics. This is a decrease of 671,702 acres, or about 3 per cent.

The area of fall wheat to be harvested is estimated at 636,000 acres as compared with 834,284 acres in 1929, a decrease of 197,984 acres, or 24 per cent.

Spring wheat occupies 23,947,000 acres, as against 24,420,718 acres in 1929, a decrease of 473,718 acres, or about 2 per cent.

Cereal crops show increases, according to the report: oats from 12,479,477 acres to 12,815,000 acres; barley, from 5,925,542 acres to 6,050,000 acres; rye from 991,944 acres to 1,092,200 acres. Fall rye occupies 765,400 acres as compared with 664,193 acres in 1929 and, spring rye 326,800 acres as against 327,751 acres last year.

Flaxseed shows an area of 451,500 acres as compared with 382,359 acres in 1929.

The area planted to potatoes is estimated at 557,000 acres, as compared with 543,727 acres, an increase of 2 per cent.

Persian Balm invests every woman with subtle charm. Delicately fragrant. Cooling and healing. Disperses all roughness or chafing. Makes skins delightfully soft-textured. Every woman should use this peerless toilet requisite. Daintiness—beauty—refinement—Persian Balm achieves these in every instance. Softens and whitens the hands. Promotes clear and youthful loveliness. All women who care for additional charm, unhesitatingly choose Persian Balm.

Icebound Ships Are Freed

Held In Ice Since Last September
Are Finally Liberated

The icy embrace of the Arctic Ocean has at last released its grip upon the American fur trading ship "Nanuk" and the Soviet steamer "Stavropol" held icebound in Siberia since last September.

The "Nanuk" was freed recently when the packed ice moved off-shore while a little later the ice broke up in the bay, freeing the "Stavropol."

It was to the "Nanuk" that Carl Ben Eielson and Earl Borland were flying from Teller, Alaska, last November when their plane crashed near North Cape, killing both of them.

Wretched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dissipates the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and normal happiness.

Canadian Destroyer Launched

Destroyer "Saguenay" Is Launched At
Southampton, England

The new Canadian destroyer "Saguenay" was launched at Southampton, England, from the Thornycroft yards recently, in the presence of a large and interested crowd. Madame Desbarats, wife of G. J. Desbarats, Canadian Deputy Minister of National Defence, performed the christening ceremony.

A sister vessel, the "Skeena," is to be launched in September. The two destroyers are of special design for use in Canadian waters. They are of 1,330 tons displacement, with a length of 310 feet and a speed of 35 knots.

The "Skeena" and "Saguenay" will replace two destroyers now on loan to Canada for patrol purposes, etc., from the royal navy.

A Power Of Its Own.—Dr. Thomas' Electric Oil has a subtle power of its own. All who have used it know this and keep it by them as the most valuable liniment available. Its uses are innumerable and for many years it has been prized as the leading liniment for man and beast.

Canada's Forests

The forests of Canada are, in the aggregate, the second most important natural resource, being exceeded in actual value of products by agriculture alone.

Minard's Liniment checks Colds at once.

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S
"FRUIT SALT"

British Naval Estimates

Additional Estimates Call For Ex-
penditure Of About \$1,000,000

The British admiralty has published additional estimates for naval construction for the current financial year, in which £208,200 (about \$1,000,000), is asked. The amount will be used for construction, allowed Great Britain under the London treaty.

Of the supplementary estimate, £183,600 is required to meet costs to submarines this fiscal year on three submarines of the 1929 program, construction of which had been deferred pending conclusion of the naval treaty.

The balance of \$24,000 will be devoted to the new construction program for 1930.

German Aircraft For Canada

Representative Of The Junkers Air-
craft Corporation Visits
Dominion

German aircraft builders are well aware of the potential market for machines in Canada, and the Junkers Aircraft Corporation, of Dessau, even anticipates assembling certain of its various types in the Dominion. One of the company's representatives is now in Montreal to investigate the situation, and will use one of the Junkers monoplanes for demonstration purposes. It is expected that he will remain several months to discuss conditions and prospects with leaders in aviation.

Farmer:—"How do you like the goat's milk?"

City Chap:—"Sorta tastes of the tin, don't you think?"

His Sight Restored

Blinded In Right Eye, Sight Is Re-
gained In Peculiar Manner

Totally blind in his right eye for 33 years, Stephen McCormack, of Sydney, Australia, has had his eyesight restored by an accidental finger poke in the eye.

When a piece of stone thrown up by a horse's hoof robbed him of the sight of his right eye, specialists were baffled.

Thirty-three years later, McCormack was exercising with a medicine ball when a companion accidentally poked a finger in his blind eye. He was seized with excruciating pains in the head and suddenly his eyesight returned.

If Mr. Ford is going to save an old-time gentleman for his museum he'll have to be quick about it.

Minard's Liniment for all Strains.

Germany's foreign trade continues near the record mark.

Millers of Great Britain and On The Continent Speak Highly of Garnet Wheat's Milling Value

Ottawa, Ont.—Considerable enthusiasm was expressed among millers of Great Britain and on the continent who investigated Garnet wheat as to its milling qualities. A report by L. H. Newman, Dominion cerealist, on the result of the investigations of a specially bagged shipment of this blend of wheat overseas has been made public. For a time at least Garnet should be shipped as a separate variety, instead of mixed with Manitobas. This would give the millers an opportunity of knowing the variety they were dealing with and they could treat it to the best advantage.

Garnet wheat, an early maturing variety of hard red spring wheat, was first available to Canadian farmers for testing in field areas in the spring of 1926. Since then it has become increasingly popular with growers of wheat in the prairies, particularly in the northern districts. The question arose should Garnet be allowed to go into the highest grade of Manitoba Northern wheat without restriction of any kind or would it be preferable to set up at least one or two separate grades for the accommodation of the variety or to continue to handle it as at present.

The Federal Department of Agriculture decided to submit Garnet to test by millers in the United Kingdom, and in different European countries. A year ago 6,700 bushels were shipped overseas to men expert in milling to obtain their opinions as to its suitability. These men were asked a series of questions, and Mr. Newman's report includes the replies they made.

In his summary of the results obtained from this test Mr. Newman states that while practically all investigators have expressed the opinion that Garnet wheat or mixtures containing the same, might have to be "conditioned" a little differently than would be the present Manitobas, yet this fact did not seem to be of serious moment.

On the other hand, a number of investigators spoke with considerable enthusiasm of the good milling qualities of Garnet wheat when milled alone or in mixtures. It should be kept in mind, however, the summary explained, that in both Great Britain and on the continent it is usually milled at a higher percentage moisture content than is the case in Canada, which fact may account for the relatively good milling behaviour of this variety in the Old Country tests.

The summary continues: "The general attitude of practically all of those who investigated this wheat in England and on the Continent during the past season, seems to have been pretty well expressed in the words of Dr. Kent-Jones, whose concluding statement is repeated as follows:

"Garnet wheat, both in milling and in baking, has certain pronounced characteristics. Millers will always be faced with the fact that Garnet will give stability to their blends but not quite the spring and elasticity which is normally given by Manitobas.

"Since English and European millers are par excellence, blenders of wheat, they require to know the exact properties of the wheats they use. I therefore recommend that Garnet wheat should be placed upon the market as a separate variety, and although in the first instance, its price might be slightly lower than the corresponding Manitoba, I am inclined to think the market would rapidly appreciate its merits and there may be times when the Garnet may command the higher price."

"Another investigator is even more emphatic when he says:

"There is no doubt in my mind that we can make very good use of this wheat in London, providing we are able to buy it separately as Garnet wheat. In fact, it has a distinct value of its own, but if mixed with Manitobas, it will not only lose its own distinctive value but will tend to greatly lower the distinctive value of the Manitoba wheats. If your farmers can send forward Garnet wheat of as good a quality as this

particular shipment, I do not think they need fear having to sell it at a great discount as compared with Manitobas."

"The question as to how Garnet compares with ordinary Manitobas for blending with non-Canadian wheat, is one which obviously could not be answered very definitely in an investigation which had to restrict itself to the crop of a single year. There was some evidence, however, to show that there might be times when by reason of some peculiarity in the season prevailing in certain wheat-producing countries, wheat of the characteristics of Garnet might actually be of greater value for blending purposes than would our present Manitobas. Similarly, there might be times when the latter wheat might be worth a little more for blending purposes. It was also shown that a mixture of Garnet and of Manitobas in fairly definite proportions might, under certain circumstances, produce better results

than if either of these two wheats were used alone in the blend.

"While the questions asked specifically of the bakers have been fairly well answered already, yet there are a number of points raised which are worthy of special consideration. Thus, the questions of absorption and bread yield, are points of importance. The findings of practically all of those participating in the present investigation, are closely in agreement with the following conclusions: 'Generally speaking, the flour of Marquis absorbs a little more water than does that of Garnet, and consequently, is inclined to produce a little higher bread yield. Since ordinary Manitobas at the present time consist largely of Marquis, it may be safe to assume that the tendency is for the former to absorb a little more water than is absorbed by Garnet.'"

Demand For Muskrat Pelts

The growing popularity for muskrat coats in Scotland is responsible for an increasing demand for muskrat pelts. One of the largest wholesale manufacturing furriers in Glasgow has announced that it will require about 20,000 muskrat skins this year, and is seeking quotations for best quality eastern Canada rats of large size and good color.

ALPINE MEMBERS CAMP ON MOST BEAUTIFUL LAKE IN ROCKIES

Where year by year increasing thousands are turning to it for rest and recreation, finding among its glorious ranges and by its exquisite lakes continual stores of joy and health, Jasper National Park will be visited this summer by Alpinists to the 25th Annual Camp of Alpine Club of Canada, in the Maligne region, July 28th to August 16th. Mountain climbers from all over Canada and the United States, many of whom will have their wives—or husbands—will be in attendance, as will also a number of distinguished visitors attending the British Medical Association Convention in Winnipeg, be on hand to make the "out camp-fires" increase in interest.

To reach the main camp, the party will be conveyed from Jasper town or Jasper Park Lodge by motor car to Medicine Lake, about 20 miles; to the upper end of the lake via motor boat, and from there to Maligne Lake a distance of about 9 miles, on foot, although a limited number of riding ponies will be available between the two lakes.

The main camp will be pitched close to the mouth of Coronet Creek at the south end of Maligne Lake; directly behind the camp, tower the buttressed walls of Mount Warren (10,800 feet). The first ascent of this peak was made by Max M. Strumia and William Hainsworth in 1928, who, from their camp at the mouth of Warren Creek, at the southeast corner of the lake, also made the ascent of the Thumb (9,200 feet); also of Mt. Florence (9,750) feet. These ascents can be made from the main camp, but with the assistance of a motor boat the

route can be considerably shortened. The double ascent of Mount Mary Vaux (10,250 feet), and its outlier, Mt. Lysyfran (9,000 feet), will be a popular expedition for beginners. To the northwest, another great group of mountains will claim the attention of the mountaineers, Mt. Leah and Mt. Sampson, impressive rock massifs. Directly opposite them rise Mts. Charlton and Unwin, topping all other peaks in the region and heavily draped in snow and ice. Directly south of these two massifs rises Amery's Mt. Julian, climbed by him and Edouard Feuz last August for the first time.

In order to climb mountains too distant to be reached from the Main Camp, an auxiliary camp will be placed at the head of Coronet Creek some six miles away, and from here ascents will be made to Mt. Brazeau (11,250 feet), Mt. Valad, Mt. Henry MacLeod (10,600 feet), Coronet Peak (10,000 feet), and other unnamed peaks. There are many minor expeditions for those whose tastes lean to less strenuous activities. Trips to places bearing such fascinating names as Sunshine Falls, Pixie Valley and the Fall of the Veil of Tears are being considered.

The new Memorial Hut at Penstock Creek, in Tonquin Valley, not far from Surprise Point, will be ready for members shortly before Camp. It is about twenty-five miles from Jasper thirteen of which can be travelled by motor on the Edith Cavell Highway and the balance by trail. It is an excellent climbing centre and many members will visit this wonderful region.

Growth of Western Provinces Within Recent Years Has Been One of Great Modern Romances

On July 15th the Province of Manitoba celebrated its diamond jubilee as a province of Canada. Manitoba was created a province in 1870, and began its career as such on July 15th of that year. The name Manitoba is a contraction of the Cree word Manitowaban, and is said to mean "The God That Speaks."

The first white men to set foot in what is now the province of Manitoba were Pierre Gaultier de Varennes La Verendrye and his sons, about 1732. In the early part of the nineteenth century Lord Selkirk began to establish a settlement of Scottish families on the Red River, and this became the foundation stock of the oldest white settlement in Western Canada.

In 1870 the province of Manitoba consisted of only a comparatively small section of land on both sides of the Red River. It has since then been twice enlarged and now has an area of 251,832 square miles. The population of the province 60 years ago was about 25,000; now it is over 638,000. The total population of Western Canada in 1870 was about 109,000. In 1930 it is about 2,650,000. Winnipeg, sixty years ago, was a settlement of a mere handful of people; in fact the official census of 1871 gave it a population of 241. Now it is one of the most modern cities of the

world with a population of over 200,000.

The growth of Manitoba and of the other provinces of Western Canada in comparatively recent years has been one of the great romances of modern times. Sixty years ago Western Canada was practically virgin territory. Railways did not link Manitoba with the Eastern provinces until the early eighties. Hardy pioneers had begun to flock into the province in advance of the railways, driving their yokes of oxen with their families, and all their worldly possessions loaded on a "prairie schooner" or Red River cart. Many of these pioneers received free land from the Canadian Government. Scarcely any of the rich fertile soil had then been brought under cultivation. The farm machinery of the time was crude; there were no competent advisers; Government experimental farms did not come until several years later. Yet those hardy pioneers stuck it out, and numbers of them are enjoying their declining days in the communities they wrested from the wilderness, prosperous, contented, with their children's families gathered about them. They have seen civilization step into the west and the wilderness swept out. Today are thriving cities and towns where bleaching buffalo bones marked the oxtails of 60 years ago. Today are mighty freight trains, each with its thousand-ton cargo of wheat or merchandise, roaring down the roads where the old carts creaked. Today are schools within walking distance of every farm house, churches within driving distance of every home. Today are telephones, radios and every modern convenience linking communities over vast distances by the common bond of the spoken word.

Canada now ranks as the largest wheat-exporting country in the world, and the second largest producer of wheat, over ninety per cent of which is grown in the three Prairie Provinces. The wilderness of a few decades ago is now one of the world's greatest granaries and also a substantial contributor of other grains, livestock, dairy products, manufactured goods, etc.

If La Verendrye, Selkirk, and others of the early pioneers had been present at the Diamond Jubilee celebration of the creation of the province of Manitoba, they would undoubtedly have been overwhelmed with the metamorphosis that has taken place not only in the area of their original settlements, but throughout the whole Dominion. Yet notwithstanding the marvellous development that has taken place in Western Canada in the past 60 years only about one-fifth of the land suitable for farming is under crop and millions of acres still await the plough. The opportunities of Western Canada are today even better than when the hardy explorer, La Verendrye, arrived in Manitoba from his native town of Three Rivers, Quebec, about two hundred years ago, and Lord Selkirk established the settlement of his courageous kinsmen on the Red River about 100 years ago.

Paid Old Debt

A 46-year-old eight dollar debt, which was incurred at the funeral of Jane Gibson, in Vincennes, Ind., negro woman, was paid a few days ago when a son called at a local undertaking establishment and settled the account. The proprietors had forgotten it.

"Doctor, can you tell me a cheap cure for fatness?"
"Certainly, madam, the cheapest is the fasting-cure."—Hummel, Hamburg.

(By Annebelle Worthington)

A little Dutch apron frock for small folk of 2, 4 and 6 years.

It's delightfully comfy and smart. It can be worn as apron to keep little daughter's frock spic and span.

It is unsurpassed for the warm days of summer, worn as a frock. The square neck is cut quite low. It's sleeveless too! It buttons down the back with the bodice tied with quaint sash.

The miniature diagram shows how utterly simple it is to make and launder. Style No. 3358 is suitable for pique, broadcloth, dimity, organdie, linen, printed lawn, Peter Pan prints, dotted swiss and batiste.

The neckline, armholes and pockets are trimmed with rick-rack braid. As a smart variation, they may be piped in contrasting colour.

Pattern price 25 cents. Be sure to fill in size of pattern. Address Pattern Department.

CANADA'S POPULATION**PREDOMINANTLY AN****AGRICULTURAL ONE**

That to Canada belongs the credit of recording what was perhaps the first census of modern times may be news to many. This census was taken in 1665 in the small colony of New France whose population was shown to be 3,215. One hundred years later this had increased to 70,000 with an additional 20,000 in what is now the Maritime Provinces. At the commencement of the nineteenth century Canada's population had reached approximately 260,000. Fifty years later it had again increased to 2,384,519, and in the first census after Confederation to 3,689,257. By the year 1900 the number exceeded five and a quarter millions. It was, however, within the present century that spectacular expansion took place and the outstanding feature of this expansion was the opening for settlement of Canada's Great North-West. Immigration which had scarcely exceeded 50,000 per annum totalled two and a half millions in the ten-year period from 1903 to 1913, making an increase of 34 per cent. in the first decade following 1900, a faster increase than that of any other country in the world. In the second decade it grew 22 per cent, and it may be interesting also to note that in 1871 just under 3 per cent. of the population lived west of the Lake of the Woods, but fifty years later Western Canada was the home of nearly 28½ per cent. of the whole.

Though Canada is predominantly an agricultural country the percentage of urban and rural dwellers is approximately equal. According to the census of 1921 the urban population was 4,352,122 and the rural 4,436,122, the rural being slightly larger than the urban. This latter fact together with the other fact that though her people are largely British-born many thousands have their origin of birth in other lands—Iceland, Austria, France, Germany, Italy, Russia, Sweden, Norway, Denmark, United States, etc.—the advantages of Canada as a country and the City of Regina in the heart of Canada's great crop growing area in which to carry out the proposal of a World's Grain Exhibition and Conference from July 25th to August 6th, 1932, becomes clearly evident.

PROVINCIAL SURPLUS OVER**HALF MILLION DOLLARS**

Provincial accounts for the fiscal year showed a surplus of \$582,170.51, according to an announcement made by Hon. R. G. Reid, Provincial Treasurer and Minister of Public Affairs.

Of this surplus \$426,980.60 is from general revenue and \$155,189.86 represents the profit on the operation of the Alberta Government telephones.

The total surplus for the year over the surplus for the fiscal year ended March 31st, 1929, amounted to \$1,578,823.

The surplus just reported is the fifth in succession which the minister has shown, a fact which is unique in the history of provincial financing in the Dominion.

LOCAL & GENERAL

Scratch Pads may be had at the Pioneer Office, 2 for 5 cents.

Mr. H. P. Hardy has returned from Taber, after a short visit with his parents.

Mr. Geo. Schade of Stavely, spent the week-end with Mr. and Mrs. J. C. Clarke.

Mrs. E. Cressman of Hillcrest, Alberta, is visiting friends and relatives here.

Miss Alda Shantz was relieving at the Crystal Dairy during Miss Enith Hunsperger's vacation.

Mrs. A. Cressman and Mrs. E. Cressman of Hillcrest, spent Sunday at the Allen Hunsperger home.

Melvil White of Great Falls, Montana, visited with relatives and friends in the district last week.

Mr. and Mrs. Ira Levagood and family motored out west last Saturday, to view the progress of the new railroad.

Mrs. Chas. E. Allen of Cozad, Nebraska, sister of Mrs. R. C. Oldham, arrived last week for an extended visit at the Oldham home.

Mr. Bruce Cressman and Mr. R. D. Curdy were visitors at the home of Mrs. A. Cressman over the week-end.

Mrs. M. L. Craig returned to Kansas City after spending a month as the guest of her uncle and aunt, Mr. and Mrs. R. C. Oldham.

Mr. and Mrs. C. Hay of Empress and Mrs. Alexander of Calgary, were visiting over the week-end with Mr. and Mrs. W. J. McCoy.

Fallen Timber Creek appeared to be the mecca of Didsbury anglers on Sunday and several parties were to be noticed along the creek. Good catches of grayling were reported.

Mr. and Mrs. C. Harpold, Mr. and Mrs. C. Long and family, Mrs. Paisley and Mr. and Mrs. W. J. Scheidt, made up a camping party at Sylvan Lake over the week-end.

Mr. and Mrs. J. Boorman and family who have been enjoying a camping vacation at Sylvan Lake and a visit to Lacombe, returned home on Sunday evening.

Bob Gooder, Bill Sutherland and Ward Wyman assisted Olds team against Calgary Dodgers in the Provincial play-off, yesterday.

Mrs. R. C. Oldham and son Richard motored last week to Banff and Lake Louise where they spent several days. They were accompanied by their house-guests, Mrs. M. L. Craig of Kansas City and Mrs. C. E. Allen of Cozad, Nebraska.

Mr. Harold Bradford and other boys who were vacationing at Camrose last week, caught a pike in Dried Meat Lake. The fish weighed 13 1-2 lbs. and measured 3ft. 3 in. long. It took the four boys all their time to land the fish into the boat.

Misses Enith and Grace Hunsperger, Zillah Cressman, Vilma Traub, Viola, Irene and Madeline Snyder spent last week camping on the banks of the Red Deer River at Johnny Manson's ranch. A very enjoyable time was spent in bathing and fishing. The weather was ideal, with no mosquitoes and all returned with a real sun-tan.

The "Plaidies," a troupe of the best girl dancers in Calgary, will appear at the Opera House on Saturday evening at 8-15 p.m. sharp. Admission, Adults 50c. and children 25c. The troupe feature the latest in tap, aerobatic, toe, ballet and national dancing. Don't fail to see this feast of snappy, musical and dancing entertainment by first-class artistes. The troupe and band secured return engagements at Strathmore and Cochrane.

Because he lost his bet on the Dominion election, Frank Conway, of Toronto, is spending his holidays at Jasper Park Lodge, looking for a chipmunk. Mr. Conway, the day before the election took place, promised to catch a chipmunk and carry it to the timberline on Whistler's Mountain if the Conservatives were returned. There are many chipmunks around Jasper Park Lodge and so far, all of them have proved more nimble than Mr. Conway.

(552)

Changes in operating organization on Canadian Pacific western lines are announced as follows:—J. H. Chown, superintendent of Saskatchewan southern lines, transferred from Regina to Edmonton; J. M. MacArthur, superintendent, Medicine Hat division, transferred to Regina; G. J. Fox, in charge of Edmonton division, transferred to Medicine Hat. These transfers are made in accordance with the company's policy of enabling its officers to broaden their experience in railway matters.

American golfers beat British players because they are more interested in the scientific angles of the game and generally speaking try harder, according to Don Moe, University of Oregon wizard, interviewed at Vancouver, travelling Canadian Pacific from the western Open at Chicago and the American Open tournaments at Minneapolis. He described English golfers as the best sportsmen he had ever encountered.

Seven hundred Americans, about two-thirds women, toured Nova Scotia recently by Dominion Atlantic Railway, after arrival at at Halifax aboard S.S. California on "A Cruise to Nowhere," the larger part of which is spent at sea outside the 12-mile limit. There were three of these cruises during July and August from New York.

Five more new bridges are to be constructed on New Brunswick highways, tenders having been called for by Hon. D. A. Stewart, Minister of Public Works, for modern structures to be built with attendant improvement of roadway alignment. One of them will be an 80-foot span across the Little River at Grand Falls.

SAFETY— at ANY speed

With the new Firestone Heavy Duty Gum-Dipped Balloon Tires you have a wide margin of safety at ANY speed. Built in advance of today's car requirements, they withstand rougher usage than any car on any road at any speed, can give them.

Firestone Heavy Duty Balloons are made of Gum-Dipped cord construction—the strongest and safest method known. They have a deeper safety tread, extra side-wall thickness and two extra plies of Gum-Dipped cords just beneath the tread to absorb road shocks. They are the strongest, safest, toughest tires that Firestone has ever built.

Make your car safer for travel. Equip it with a set of new Firestone Heavy Duty Balloons. See your nearest Firestone Dealer today.

Sermon Subject: "The treasure hidden in a field, and a goodly pearl."

PEONY DAY

October 1st to be Recognized as Peony Planting Day

Tulip days, Rose days, make us think of those glorious displays in some of the Pacific Coast cities. In Alberta over 600 organizations are being circularized by the Town and Rural Planning Board in support of the suggestions of Mrs. F. E. Wyman, Vice-President of the U.F.W.A., that October 1st of this and succeeding years should be a day on which the people of this province should plant peony roots. The peony is one of our hardest perennials and one of our most attractive flowers.

Circulars are being sent to the secretaries of the U.F.W.A. locals, Women's Institutes and to Horticultural Societies. These organizations are being requested on behalf of members interested to place early orders for peony roots with their nurseries. Already several organizations and those interested in horticulture have expressed themselves as in greatest sympathy with the movement, states Mr. Horace L. Seymour, Director of Town Planning.

It is also hoped to interest the school children of the province on their return to school and that peony roots will be planted at each school and one or two at every home, the cost of the ordinary varieties of white, pink or red peonies being very reasonable.

Circulars in regard to the planting of peony roots are being distributed and may be obtained at the office of the Director of Town Planning, Edmonton, Alberta.

A MILLION MATCHES

The Forest Service of Canada have been preaching the doctrine of fire prevention to the tenderfoot and the novice who have yet to learn its necessity, and yet the annual toll of life and valuable timber takes place as inevitably as the collection of taxes.

It is estimated that ninety per cent of forest fires are due to nothing more or less than the carelessness of the summer camper. If reasonable care were exercised by everyone who enjoys a camping holiday nine out of every ten fires would never get a start at all, and there would be a saving to Canada of tens of thousands of valuable timber, to say nothing of the great unnecessary human sacrifice.

Considered from an economic point of view it is ruinous to many trades when the timber is burned throughout whole districts. Sawmills cannot be built in such places, big game do not breed midst blackened stumps. The lumber industry means \$350,000,000 a year to Canada, pulp and paper industry represents \$190,000,000. Trapping turns over \$20,000,000 annually, while tourist trade is estimated at \$200,000,000 a year and is increasing as time goes along. Here is a grand total of wealth to the Dominion representing the huge sum of \$760,000,000 per annum, every cent of which depends directly on our forests and may be said to be at the mercy of the summer camper, for weal or woe.

Parents should teach their children the sacred duties of Canadian citizenship and see that no careless child with matches can run loose in the woods, for a match may destroy a million trees, while a tree will make a million matches. Do not start little bonfires for fun and thoughtlessly go off leaving embers still warm. Teach the camping groups that every big fire was once a little one, therefore kill the fire while young. Most boys and girls love the wild creatures of the woodland, therefore appeal to their sense of fair play and give the game a chance to feed and thrive and breed by preserving their home.

SATISFACTION

CANADIAN MILK IN ORIENT

"Fresh milk; fresh milk from British Columbia," is the cry that may soon resound through the Orient as a result of the enterprise of W. P. Jones, manager of the Brooksbank Dairy, Eburne, B.C., says W. W. Duncan, provincial markets commissioner.

Mr. Jones has already established a market in Hong Kong for British Columbia milk and is making regular shipments across the Pacific in refrigerator space. The milk arrives in China in first-class condition and is readily seized upon by European residents of that city.

Here and There

(G38)
Taking turns while the engine was under a full head of steam, Engineer H. J. Storey and Fireman A. Fulkerson, dumped the fire and entered the fire box of the engine to make running repairs of grates displaced from the grate carrier on Canadian Pacific engine 570 at Hope, B.C., recently. They could stand the intense heat only a few minutes at a time, but they succeeded in their work and saved serious delay, bringing their train to destination within a few minutes of scheduled time. They were each awarded 10 merit marks, the railway's recognition of conspicuous merit.

Opera Season at Banff

Twice a week during July and August, the Light Opera Company of Alfred Heather has been engaged to play at the Banff Springs Hotel. A very wide variety of operas will be produced including Gilbert and Sullivan, eighteenth century compositions and light and ballad operas by Canadian writers and composers on Canadian subjects.

Among the artists playing are Alfred Heather, widely known as the original Filch in "The Beggars' Opera," a work which is among those to be played

at Banff; Allan Burt, light baritone, formerly with the American Opera Company; Beatrice Morson, contralto, who toured with "The Beggars' Opera"; Jean Haig, lyric soprano, popular Canadian radio star; Randolph Crowe, baritone, who made a big hit in his rendering of John the Butcher, in "Hugh the Drover"; Mary Frances James, soprano, who has played with success in ballad operas produced at Canadian Pacific Festivals; Herbert Hewetson, tenor; Amy Fleming, contralto, and Enid Gray, mezzo.

PIMPLES

WORLD HAPPENINGS BRIEFLY TOLD

Sir Esme Howard, British ambassador to the United States, who was granted a barony on the recent King's birthday, has taken the title of Baron Howard of Penrith.

Professor Ludwig Stein, internationally known philosopher and author, died at a nursing home at Salzburg, Austria, after an operation. He was 70 years old.

Canadian shipping companies had the bulk of the wheat business on the Great Lakes last month, according to the report of the Lake Shippers' Clearance Association.

The British Government is highly pleased by the shipbuilding holiday agreed to by France and Italy. Premier J. Ramsay MacDonald told a questioner in the House of Commons.

The financial situation among Chicago's 13,000 public school teachers is once more acute. It is vacation time and pay cheques are three weeks overdue. To date, the back pay amounts to \$6,500,000.

Hundreds of thousands, celebrating 300 years of Massachusetts history, heard Sir Ronald Lindsay, British ambassador, bringing the greetings of the ancient mother state to the sovereign state of Massachusetts.

G. W. Jones, Canadian expert on taxation, has arrived at Canberra, Australia, at the invitation of the government of the commonwealth, to advise the administration regarding the operation of the sales tax introduced in the budget brought down recently.

British unemployment figures still are soaring upward a government report indicated. The Ministry of Labor announced that on July 7, the total out of work was 1,933,500, a gain of 42,925 over the previous week and 789,254 more than the same period last year.

Bright Spots At Port Churchill

Northern Port Now Boasts Of Four Lady Residents

Up on the rocky shore of Hudson Bay, Churchill was once "No Woman's Land." For five years—including the winters—Mrs. A. Gibson, wife of the Church of England minister, has made the new port her home. But this summer Churchill boasts its largest contingent of femininity—four women.

Three new lady residents came north on the Muskeg Limited late in May. They were: Mrs. S. Martin, wife of the United Church missionary; her daughter, Margaret; and Mrs. Claude Johnson, wife of the divisional engineer of the Canadian National Railways. All three will reside at Churchill until autumn.

Alberta Beet Sugar Production

It is expected that about 24,000 tons of sugar will be produced from the sugar beet crop in Southern Alberta this year. Growing of sugar beets in the Raymond district, Alberta, is an important industry.

The United States produces more than 21,000,000 gold fish for commercial purposes in a year.

"Why haven't you written out your lines: 'I must sit still'?"
"But I couldn't write them when I had to sit still, sir."—Moustique, Charleroi.

W. N. U. 1847

Will Increase Safety In Steel Construction

Electrical Finger "Feels" Strain In Steel When Under Great Pressure
An electrical finger that "feels" the invisible twists and strains in steel under great pressure was described to the American Society of Testing Materials.

The purpose is to increase safety in construction by making under conditions of actual use tests heretofore confined to research laboratories. The device was described by J. P. Shamberger, of Pittsburgh, who said it was designed by J. G. Ritter, of the Westinghouse Electric & Manufacturing Company.

No longer than a human finger, and not much thicker, it bolts to the side of a rail and records the bending as a 100-ton locomotive thunders over. If placed on a curve it will show the side twist of the rail under the locomotive's thrust. It can be laid upon an automobile wheel to detect how nearly bumps come to causing overstrain.

The finger works somewhat like a slide rule, being of two parts, which telescope. This telescoping amounts only to the diameter of a tremor or a vibration, that is, something like one ten-thousandth of an inch. Even so slight a motion slides a piece of iron to or from between two sensitized electrical instruments on the finger.

These instruments correspond to the sense of touch. They detect the motion of the bit of iron, and with it the distortion which causes the movement. They register this movement by slight electrical changes.

The "nerves" of the finger then come into play. They are plain wires, which carry the slight electrical disturbances to instruments that amplify them into movements an inch long, that can be calibrated in terms of wear and tear.

Made Fortune From Linoleum

Ingenuity Of Englishman Started Him On Road To Wealth

Lord Ashton, whose amazing fortune was between thirty and forty millions, owed his wealth originally to his clever father's ingenuity, says the News of the World. The father was a working house painter who started a little shop in Lancaster, where he combined with his trade a picture-framing business. When cellophane was introduced from America he improved on it by giving it a backing of powdered cork instead of cloth. So linoleum was invented and his fortune made. Lord Ashton himself worked in his father's factory from an early age and proved a wonderful man of business.

Grain Stocks Decrease

Grain In Store At End Of June Shows Decrease Of Over Three Million Bushels

Returns received as to stocks of grain in store for the week ended June 27, 1930, show a decrease of 3,277,506 bushels, according to a report issued by the Dominion Bureau of Statistics. Stocks for the week were as follows: Wheat, 13,735,712. Oats, 9,927,331. Barley, 22,639,184. Flax, 512,382, and Rye, 8,241,089, a total of 172,155,698 bushels. Decreases are noted in wheat of 2,281,693. Oats, 356,580. Barley, 3,771. Flax, 38,061, and Rye, 387,411 bushels. For the same week last year the amount in store was 148,620,622 bushels.

White Pine Best For Patterns

White pine is used for 90 per cent. of the patterns made in North America. The reasons for this, are, that white pine, more than any other wood, is easily worked, is of soft texture, is comparatively strong, is very durable and, most important of all, has very little shrinkage, which gives it the power to hold its shape indefinitely after being worked.

A Good Definition

Col. "Pat" Hurley, of Oklahoma is a lawyer, but his business interest is oil and real estate. His definition of oil operators is: "An oil operator is a man who doesn't know whether he is four feet from \$1,000,000 or 1,000,000 feet from \$4."

The trap door spider covers its tunnel with a trap door, neatly beveled to fit the opening, and hinged at one side. The door is made of alternate layers of silk and soil.

British airplanes now in regular use carry 22 passengers.

Long Delayed Work Has Been Commenced

Memorial To Latin Poet Was Thought Of Century Ago

At the gates of Mantua, in Italy, where Virgil was 2,000 years ago, a park is to be opened in which the memory of the poet may haunt the Virgilian grove like "a green thought in a green shade," as an English poet once wrote.

In this wood are to be planted all the plants and flowers named in the works of the Latin poet. The brown reeds, the silver-leaved willows, will be there. The poplars will whisper in the breeze.

It is the best possible way of commemorating the poet, whose birth is now being celebrated in various ways throughout the world.

A bi-millenary (as we call 2,000 years), does not in itself mean much. What are 2,000 years in the life of an immortal? But what is most interesting about the completion of this wood at Mantua is that the idea of planting it was born 100 years ago, and has been put off by wars and rumours of wars ever since.

The Austrians and the Russians destroyed all the preparations made in 1797, and Napoleon did nothing to forward the idea.

After nearly 100 years the project was revived at the end of the 19th century; but nobody could spare money and the Great War destroyed the project. Now at long last it has been revived and promises to come to fruition.

Empire Trade Extends

Bananas From British West Indies Reach Western Canada

Canadian agriculture is ever seeking new markets, and producers in other parts of the Empire are working toward an extension of the market for those of their products Canada needs. Information received by the Minister of Agriculture at Ottawa, shows that during the past year 208 carloads of bananas were shipped into Western Canada from the British West Indies. Word now comes that the first shipment of oranges and lemons from New South Wales reached Vancouver on July 15. Canada reciprocates with her exports of potatoes to the West Indies and with shipments of apples and onions to the Antipodes.

An "intelligent" perfume "filling" apparatus has been devised, which refuses to drop any liquid into a bottle that happens to be imperfect.

A property in Durham, England, is held at the "rent" of three grains of pepper yearly.

Consume More Meat

Substantial Increase In the Quality Of Meat Consumed By the Average Canadian

Reports of the Live Stock Branch of the Dominion Department of Agriculture, show a substantial increase in the quality of meat consumed by the average Canadian, particularly beef, lamb and mutton. In 1928, the home market absorbed 648,600,000 lbs., while in 1929 it absorbed 676,800,000 lbs., an increase of 28,000,000 lbs. of beef, or roughly 2 lbs. more per capita. The Canadian market consumed 70,500,000 lbs. of lamb and mutton in 1929, compared with 62,200,000 in 1928, an increase of 8,300,000 lbs., or nearly 1 lb. per capita.

Outdoes King Of Birds

Flock Of Eagle Raiders Were Annihilated By Airplane

After longing for unnumbered centuries to fly with the wings of an eagle, man has at last even outdone the king of birds. A flock of eagles raiding the sheep ranches near El Paso, Texas, were annihilated by an airplane with a passenger carrying a shot gun. In eight hours the 'plane had accounted for nine birds which a rancher had been trying to shoot from the ground for a year.

Candy making is one of the least hazardous of the specialized industries, both from accident frequency and severity.

Make Your Windows Pay

Invest in WINDOLITE Windows and you will be repaid a hundredfold in the health of your Poultry and Live Stock

WINDOLITE

THE ORIGINAL GLASS SUBSTITUTE

MADE IN ENGLAND SINCE 1917 ON ORIGINAL PATENTS

This unbreakable glass substitute is light and flexible, easy to cut and fit, will withstand extreme changes in temperature, keeps out cold and wet, but

allows the full sunlight to enter, including the health-giving Ultra-Violet Rays, which do not penetrate ordinary glass.

CHAPTER XX.—Continued.

"It does," Grandma agreed.

"I wouldn't have believed Sarah could write two lines, to say nothing of six pages, without mentioning Jimmy. It come over me, Grandma, to wonder if maybe he's got into some trouble."

"Trouble!" echoed Grandma in amazement. "What on earth are you driving at, Lizzie Baker?"

Miss Lizzie shook her head dubiously.

"Jim's a country boy, Grandma Davis. He's been brought up secluded, you might say. And they ain't so very far from Hollywood, which is a wicked place, full of vampires and divorcees. If you read the papers as carefully as I do, Grandma, you'd know that Jim is liable to meet temptation."

"And liable to overcome it, if he does," snorted the old lady with indignation. "Don't you get to romancing about Jim, and telling your inventions to every one that comes along. Such stories grow faster'n fireweed on a burned wood lot. Here comes Ezra Bascomb with the mail. You needn't stir, Lizzie; the doctor's getting it. Well," as the young man came inside, "were there any letters, or just that catalogue?"

The doctor greeted Miss Lizzie gallantly, and responded: "There's one for Charmian. I'll take it along and leave it at the school."

From behind the caller's broad back he winked at Grandma, and she asked: "Is it a thick one, Doctor?"

"It took two stamps to bring it," he replied.

"Who's it from?" put in Miss Lizzie. "It seems like an awful extravagance for a person to use two stamps unless it's a matter of life and death. Who can be writing Charmian such a long letter, I'd like to ask?"

The doctor laughed and answered: "Then you must ask Charmian. There's a heavy penalty for tampering with the U.S.M.! I'll have a look at the furnace, Grandma, and then be off. If any messages come in just call up Doctor Howe. I'll stop there on my way back."

"I suppose I'd better go," remarked Miss Lizzie, rising. "I left some apples in the oven, and like as not they're burned to cinders. I wish the doctor and Charmian would get married."

PAINS

No matter how severe,
you can always have
immediate relief:

Aspirin always stops pain quickly. It does it without any ill effects. Harmless to the heart; harmless to anybody. But it always brings relief. Why suffer?

ASPIRIN

TRADE MARK REG.

W. N. U. 1847

ried, Grandma. It's such a comfort to have a man to tend the furnace. I donno how he can help bein' sweet on her, either, livin' right here and seein' her every day. Do you think there's hope?"

"We're told that while there's life there's hope, Lizzie," responded Grandma with a chuckle, "but I haven't an idea how Charmian would take to your suggestion."

Miss Lizzie sighed, wound the scarf about her neck three times, and fastened the moth-eaten fur above it.

"Girls have changed," she said. "It's this younger generation stuff you read about. In my day, Grandma, a girl would have been considered nothing short of a fool to turn down a fine young man like Doctor Carter—and Charmian's no fool."

"You're right," admitted Grandma, "my girl's no fool," then added to herself as she watched her caller waddle across the street, "and so far's I know, she hasn't turned him down!"

CHAPTER XXI.

Charmian was buttoning the last small Wickfielder into his coat when the schoolhouse door opened to admit John Carter. The girl looked up with a smile as she finished her task, and the doctor, pulling off his gloves, went to the stove to warm his hands. Charmian sped her pupil on his way, and said, as she closed the door:

"I suppose my chariot awaits me. You're awfully good to me, John. I'm tired today, and thankful to escape the walk."

"So you really admit you're tired? I'm surprised—after—"

She laughed, and interrupted: "I'm sorry I snapped at you last night when you were good enough to inquire for my health. I'm all right, truly; but I've been worried about something. That's why I blew up the way I did. I have a beastly temper."

John Carter smiled.

"Will this allay some of that worry?"

He produced Jim's letter and held it out, while Charmian, her eyes detecting the familiar penmanship, drew a relieved breath and the color flamed gloriously in her cheeks.

"When did it come?"

The question was tremulous because she seemed to feel the doctor's eyes boring into her head, in an effort to read the thoughts therein.

"Ezra left it as I was starting. I'm going to South Wickfield for a call. Perhaps you'd rather stay here till I get back and read your missive in peace—I see it's lengthy—or you can peruse it while I see my patient. As a physician, not as a selfish human being (though you might think so), I prescribe the ride."

Charmian hesitated. She longed to read Jim's letter in the solitude of the deserted schoolroom; but on the other hand she needed the fresh air, and since John had been kind enough to stop for her, it seemed discourteous not to accompany him.

"Is it still frightfully cold?" she questioned, with a glance at her old ulster. A fresh leak in the back hall plus an extra ton of coal, had made the new coat impossible at Christmas time.

"I've got a wrap for you outside. I'll bring it in and warm it."

He was away, and Charmian tore open her letter, glancing first at the ending, her ears alert for the doctor's returning step. "Yours always, Jim," was what she read, and her heart lost some of its burden at the friendly words. Jim wasn't mad, anyway! The missive was stuffed into her pocket when John returned bearing a heavy ulster of his own.

"This will go over yours, and you'll be warm as toast. It's really a glorious winter day, Charmian, no wind and a clear sky. I left your grandmother in close confab with Lizzie Baker, so she's not lonely; and anyhow, she knew I was going to bring you home so she won't worry if you're a trifle late. There! You look like—"

He laughed as he buttoned the top button close under her chin, and Charmian asked: "Like poor, dear Miss Lizzie? Help me turn back these sleeves, John. Now I'm ready. Will you lock the door, please?"

He obeyed, and said as he tucked the robe carefully around her: "If you're tired, don't talk. Just rest your eyes on the landscape or close them if you prefer. I won't chatter."

Charmian smiled.

"That sounds like an echo. Jim Bennett said almost those same words one day last fall when he picked me up. I'd had some trouble with Deacon Purdie, and was all in. I

think the deacon was trying to get even with us about those beads, John, and used one of Luella's boys as the scapegoat. I was scared to death for fear I'd lose my job."

"And you never spoke of it at home! Why not?"

"It would have worried Grandma because she was responsible for that shrewd bargain. Besides, it wasn't necessary. Jim fixed it—somehow. Uncle George Knowles asked me what I'd do without Jim to fight my battles; but I suppose when we lose something we've always had and counted on, we just have to make the best of it, don't we?"

The doctor didn't answer this question; but after a moment he broke the silence by saying: "I didn't know that Mr. Knowles was your uncle, Charmian?"

"He's not, by law—only by love," she answered. "Jim and I have always called him Uncle George. Jim's father was his closest friend, you know; and as for me—well, he always wanted a daughter and never had one, so that explains it. He can't get over the fact that none of his boys fell for me!" she finished, looking up with a smile in her blue eyes.

"They must be morons, all three of 'em," responded the M.D. with becoming gallantry.

"Far from it! They're making names for themselves, those boys. I think I was too much like a sister to them—they'd always had me hanging 'round. Then, too, George Junior was a bit odd; and Sid was too young; and Bill, Jim's chum, never had eyes for any one but Madge Merry. I wish you knew her, John. She's a wonder, and my best friend; but she hasn't been much use to me since she married Bill and went to live in Indianapolis! He's on a paper there, and doing splendidly."

"I seem to have learned some Wickfield history," smiled John Carter. "Here's where I stop. I'm likely to be a good half hour. Are you warm enough?"

"Snug as a bug in a rug, as Grandma says. Don't have me on your mind a minute."

"Easier said than done, I fear," he answered, his gray eyes smiling; and as he turned away the girl drew out her letter.

She read: "When I got back from a three weeks' trip hunting a fruit ranch, and found your letter stuffed into the slit in our front door (it must have been left there before the post office got word to forward mail). I swore a deep, dark, terrible, bloody oath that would have turned my mother's hair quite white if she had heard it. And after I read what you had to say to me, only my dyed-in-the-wool New England caution saved me from sending you a telegram that would have broken the bank at Monte Carlo—not caution at the expense, please understand; but you know yourself, Charmian, that a telegram in Wickfield is about as private a matter as the Grand Central Station is in New York. . . . Hence my caution. I wish . . ."

Charmian closed her eyes a moment. They had misted unexpectedly, and she wanted to wink the mist away and go on reading. The letter sounded so much like Jim! she told herself foolishly; and then laughed at the thought. How silly she'd been to worry about his silence! What an idiot to think he could be angry, or not care enough to write!

Authorities Are Puzzled

Condemned Man In Estonia Chose Of Canning Fruits and Recovers

Serge Vasilanko's stomach has literally saved his neck.

Sentenced to death, Vasilanko was given his choice between the poison cup and the noose, according to Estonian law. He chose the hemlock draught, in true Socratic fashion, drained it to its bitter dregs—and then refused to die. Languishing for some weeks in the hospital, his sturdy body battling the poison, Vasilanko finally rose from his bed a few days ago, fully alive.

The authorities were puzzled. There was no precedent for this. They had given the prescribed dose, but the man still lived. Courteously they offered Vasilanko the business end of a hangman's rope, but he sent regrets.

"I have complied with the law to the letter," he said. "I see no reason why the ceremony should be repeated."

And until someone finds a reason to the contrary, Vasilanko lives a free man, with a stomach to be proud of.

Warship Saves Woman's Life

Exciting Race Of Australian Warship "Anzac" In Teeth Of a Tornado

The exciting race of the Australian warship "Anzac" in the teeth of a tornado to save the life of a light-house keeper's wife has thrilled Australia.

When word was received that Florence Broderick, pretty 21-year-old wife of the lightkeeper of Gabo Island, was dying, the "Anzac" was ordered to sea with a surgeon. After being battered by the storm and swept from end to end by mountainous seas, the warship hove to off the barren island.

Bluejackets rowed the surgeon through the surf to the rocky shore and all that night he remained at the woman's bedside. In the morning he was able to report that the crisis had passed and the patient was out of danger.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

Alberta Development Board

Southern Section Has a Fine Record Of Achievement

"The Alberta Development Board, southern section, enters the third year of its operation with a fine record of achievement," says the Calgary Herald, "which is no less remarkable and valuable because it cannot always be reckoned in exact dollars and cents benefit to the people of the communities which it serves." The Board's work covers a wide variety of activities, all designed to make known the attractions and industrial and other opportunities of the area covered.

Remove all callouses and enlargements from your stock with Douglas' Egyptian Liniment, a wonderful remedy.

Argentina Wheat

Maintaining Lead Over United States In Shipments To Britain

Argentina is maintaining a steady lead over the United States in wheat shipments to Great Britain, England's import figures for that cereal recently made public revealed.

Shipments from Argentina reached their peak last year when the South American republic's total was 84,776,496 bushels against America's 41,563,124.

This year's figures to June 30 were, United States 12,204,152, Argentina 19,187,620, while in 1928 the figures were: Argentina, 45,545,360, and United States, 44,170,068.

For Blisters and Boils—Minard's Liniment.

Little Helps For This Week

"Let every man prove his own work, and then shall he have rejoicing in himself alone, and not in another."—Galatians vi. 4.

Nor serve we only when we gird Our hearts for special ministry; That creature best has ministered Which is what it was meant to be.

"I have desisted," says King Alfred the Great, "to live worthily while I have lived, and after my life to leave the men that should be after me a remembrance in good works." How lofty the simple words are! Duty, not romantic achievement, is the aim of his life; not to do some "great thing," but the right things, the right thing being simply what God gave him to do. He seems to have felt in his inmost being that each man was sent into the world, not to live like some one else, but to do his own work and bear his own burden, precisely the one work which God has given him, and which can never be given to or done by another.

—Elizabeth Charles.

Terribly Weak

Strength Regained Through the Use of Dr. Williams' Pink Pills

"After the birth of my baby I was terribly weak," says Mrs. Jos. Morasse, Dupuy, Que., "and could not sleep or do my housework. I was despondent and was afraid I would be a constant invalid. I began taking Dr. Williams' Pink Pills, and before long my health was restored and I could do my housework without fatigue. Since then I have used these Pills on two other occasions with splendid result."

Dr. Williams' Pink Pills enrich and purify the blood. That is why better sleep, steady nerves, improved appetite and increased vigor follow their use—all these can be yours if you start treatment today. The Pills are sold by medicine dealers or by mail at 50 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Construction Contracts

The month of June showed an increase of 16.7 per cent. in the value of construction contracts awarded throughout Canada, says "McLean Building Reports." Awards were greatest in the business buildings classification, 37.1 per cent. of all construction came in this group.

Daughter Is Stronger Now

"My daughter Catherine is fifteen years old. She was very irregular, often sick at her stomach and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls are taking it with good results."—Mrs. Clarence Jenkinson, Box 14, Thornloe, Ontario.

Misses Maud and Laura Johnston are visiting their sister, Mrs. E. Vetter of Three Hills.

Mr. and Mrs. E. Krebs spent last Sunday with Mr. and Mrs. Lutkehouse at Bergen.

Mrs. Whiteside and Douglas spent the week-end at Sylvan Lake as guests of Mr. and Mrs. S. Tighe.

Mr. Edgar Wiggins returned this week from Manitoba, having visited his father and found him in a very weak condition.

Mr. and Mrs. A. Krebs and Mrs. Cunningham and children of Winnipeg, visited with Mr. and Mrs. Byrt of Elkton on Sunday.

A number of the young people were entertained at the home of Mr. and Mrs. A. Krebs on Sunday afternoon.

The young folk are certainly enjoying the swimming at the dog-pound this year. The water is still a great attraction, as large crowds gather every afternoon and evening.

Mrs. O. O. Swingle and family, Mr. Wiggins and Mr. Foss have returned from their trip and report having had a wonderful time. When they left Mr. O. R. Swingle, he was not feeling as well as he had been, the few weeks previous.

Burnside Notes

Freddy Metz is sporting a Ford coupe. Now, girls, look out!

Mr. Jos. Beamish of Hamiota, Manitoba, is visiting his daughter, Mrs. Bert Pross.

Misses Jessie Topley and Anita Sheils are spending their holidays at the C.G.I.T. camp at Sylvan Lake.

Mrs. Clarence Weal and son Teddy of Calgary are visiting the former's parents, Mr. and Mrs. A. E. Thompson.

Mrs. W. Slack and daughters of Airdrie spent the past week with Mr. and Mrs. George Metz.

Mr. and Mrs. A. E. Thompson and son Harold and Mr. and Mrs. N. Eckel and son Robert attended the Olds Fair last Wednesday.

RUGBY NOTES

Rugby W.I. held their August meeting at the home of Mrs. Wahl. Owing to it being holiday time, there was a much smaller attendance than usual. After the business was concluded, Mrs. Bolton gave a very interesting and instructive paper on the "History of Music," tracing its growth from the earliest times up to the present-day. The flower and vegetable contest will be held this year in Westcott School on August 26th. The September meeting will be at the home of Mrs. C. Youngs.

WESTCOTT W. I.

Westcott W.I. met at the home of Mrs. A. M. Robertson on Thursday, July 31st. Mrs. J. Robertson read a paper on Japan and Miss Mildred Levagood rendered a couple of Japanese piano-forte selections, while little Joyce Levagood, attired in Japanese costume, sang a Japanese song, accompanied by her sister at the piano. A large number of members and visitors were in attendance, among the visitors was Mrs. Boyce, who gave an address on the W.I. A delicious lunch was served by the hostess and everyone went home after spending a thoroughly enjoyable afternoon.

CONSERVATIVES HAVE 139 SEATS

With the awarding of Yamaska by one vote to the Conservative candidate, the Conservative party now has 139 seats; Liberals 86; United Farmers 10; Liberal-Progressives 2; Labor 3; Independents 1. This is the final standing.

Sylvan Lake.**

The Intermediate League of the Christian Endeavor (Evangelical Church) returned last Saturday evening from their annual holiday camp at Sylvan Lake where they spent a most profitable and enjoyable week. The group consisted of twenty-two local boys and girls of the 'teen age. The camp program which was of an educational as well as recreational, was carried out as follows: Forenoon—Religious education: 1. Morning worship round the breakfast-table. Everyone took prayers in turn when called on; 2. Short periods of bible study; 3. Short talks on christian citizenship; 4. Question box and answers; 5. Talks on finding your life-work; 6. Round-table discussions, etc. Afternoon—Recreation: 1. Hiking; 2. Bathing; 3. Boating; 4. Playing ball; 5. Stunts, etc. Evening—Campfires: 1. Campfire programs; 2. Vesper songs; 3. Campfire lunches; 4. Evening prayers; 5. Goodnight all. Rev. and Mrs. Roppel who have supervision of this work, aim to give this annual holiday-camping to the C.E. boys and girls, free of charge, as a reward for their faithfulness in the Sunday School and Christian Endeavor. The measure of joy and appreciation was evidenced by the spontaneous laughter and yells indulged in on the way home in the big truck. We were glad to see them coming home so happy.
